# DRINKS COOLER

Your **FRIO® Drinks Cooler** can be used, and re-used, over and over again by simply activating with cold water.

### **Instructions – Please Follow Carefully**

- 1 Immerse your **FRIO® Drinks Cooler** in cold water for 6-9 minutes, then remove.

**Note: the crystals within the cooler swell in to gel once activated with water. Over-soaking will cause the cooler to over-swell and your drink may not fit inside the cooler.**

- 2 Allow any excess water to drain away. Dry with a paper towel. Insert your pre-chilled drink straight from the 'fridge.

### **Your drink will now stay cool for hours.**

When not in use, allow the cooler to completely dry out naturally until the gel returns to crystal form. Store in a dry place.
